\$500,000 boost for Bordertown's new freight handling facility

A \$500,000 freight facility grant is expected to bring economic benefits for Bordertown and the wider region. Through the State Government's Regional Growth Fund, the grant aims to help develop Shield Resource's freight handling, transhipping and loading facility located at the Bordertown train station.

Showtime is here!

BY LOUISE HOROBIN

STRONGMEN, axemen, mighty trucks, champion athletes, rare tractors and lambs, lambs, lambs - yes, the Mundulla Show is on this weekend.

Planning is all in place for the annual event which boosts Mundulla's population into the thousands for one weekend of the year.

Show president Greg "Nugget" Hunt said there will

be a raft of new events at the show this Saturday.

"This year, our volunteer committee has outdone itself in finding new and interesting features for the show, with a group of people mounting a truck show, another group running a tractor pull, and still others organising a ladies interest pavilion," he said.

"There are all these new things as well as the traditional events that have made

the Mundulla Show one of the best in the state."

Mr Hunt said there will be two very rare and unusual tractors at the show.

Supporters of the show from Goolwa are bringing an Upton two-wheel drive tractor, the only one of its kind ever made and the biggest two-wheel drive tractor in the world.

News that this tractor will make a rare public appearance has sparked immense

interest from among tractor aficionados across the country with many making the trek purely to see this unique machine.

It will be displayed alongside a six-wheel drive, 450hp Chamberlain tractor, built by the Morgan family at Karoonda, another one-of-a-kind machine.

For those who prefer their horsepower in human form, strongman Jordon Steffens will be demonstrating his

awesome muscle power with some massive lifts during the day and a truck pull in the evening.

Lambs return to the show with the re-introduction of the Prime Lamb competition, featuring both live and on-hook judging.

Over 40 lamb producers are expected to enter lambs, and many companies which supply farm technology will be on-site.
